

5^r MULTI-TECHNOLOGY PLATFORM *leadership by design*

SCALABLE

Software upgradeable assures support of the latest features

INNOVATIVE

Widest range of emulations for easy consolidation of multiple printer brands

BEST-OF-BREED

PowerPC controller and new high-performance 5^r driver deliver industry-leading throughput

BUILT FOR CHANGE

Snap-in print head allows operator to easily replace print heads and change from 203 dpi to 300 dpi printing

SMART READY

RFID field upgradeable supports future RFID requirements

SUPPORTING YOUR THERMAL PRINTING NEEDS TODAY AND TOMORROW

T5000^r thermal printers, based on the world-class 5^r Multi-Technology Platform, are web-enabled, industrial-grade thermal bar code label printers designed to operate in demanding manufacturing or distribution environments. Through *leadership by design* Printronix thermal printers enable the rollout of bar code label printing throughout the supply chain with an open migration path to RFID for future requirements. Users can obtain RFID upgrade kits as needed when supply chain applications require advance

tracking and compliance. Upgrade kits have everything needed to upgrade to a multi-protocol SmartLine™ printer.

Optimized with PrintNet® Enterprise, the T5000^r printers allow IT network managers to remotely control, configure, manage and monitor printers over the network. And with Online Data Validation (ODV™) and ODV Data Manager, users have a closed loop system providing the security of 100% guaranteed good bar codes with documented readability reports.

ADDITIONAL FEATURES

- Unique dual motor ribbon system eliminates clutch replacement and ribbon wrinkle
- Aluminum die-cast design dampens vibration and maintains precise printer alignment
- Ventless system operates in environments with airborne particulate matter without compromising performance
- Easy side-load, cleaning and maintenance
- Wireless/Ethernet option provides real-time data access and local printing flexibility
- The GPIO option offers unparalleled integration with third party equipment
- Greater ribbon capacity eliminates frequent attention and disruption to workflow
- ODV option offers a complete bar code/RFID compliant solution
- PrintNet Enterprise option provides total control of worldwide print operations remotely

ASSET PROTECTION

The Printronix T5000^r thermal printers provide an upgrade path to RFID through a comprehensive upgrade kit solution compliant to today's standards and compatible for growth to expand to tomorrow's needs. Built on the 5^r Multi-Technology Platform, the T5000^r offers a foundation for protocol upgradeability and expansion through firmware upgrades. Available upgrades include global frequency kits and RFID upgrade kits for multi-protocol EPCglobal Class 0, 0+, 1, Philips 1.19 and future EPCglobal Class 1 Gen 2. The T5000^r eliminates service calls with field installable snap-in print heads that allow easy resolution change and the most extensive list of options such as ODV, guaranteeing 100% good bar codes every time.

PRINTRONIX®
GLOBAL PRINTING...ENABLED.
